

# Video Distribution Solutions

## Passive Video Splitter Module

### Description

Video Distribution System offers seamless integration of modulated audio/video signals with CATV services, delivering flexible, multi-channel viewing across multiple locations. By combining signals through the Modulated Video Distribution and Video Combination Module, reducing installation costs while enhancing convenience and control.

### Applications

- Multi-Room TV Distribution
- Home Entertainment Systems
- Hotels and Hospitality Installations
- Commercial or Office AV Systems

# Video Distribution Solutions

## Passive Video Splitter Module

### Features

- Multi-Location Signal Distribution
- High Signal Quality Transmission
- Wide Frequency Support
- Centralized and Structured Wiring Design
