

Residential Enclosures

Metal Residential Enclosure

Description

EmCom's metal residential enclosures are available in 14, 18, 28 and 42 inches providing wide selections for small to large size houses. Rear/top knockouts with plastic grommets that protect cable jackets and also allow enclosures for flush or surface mount applications. The enclosures are also available in hinged version with removable door and locks for more secure installation. The surface mount enclosures HWS-702 & HWS-712 are ideal for SOHO for small size installation. EmCom's patented smart "slide`n` fit" installation design for brackets and enclosures provide the easiest way while installation and hence save considerable labor cost.

Applications

- Structured Home Wiring Systems
- Home Networking and Internet Distribution
- Smart Home and Security Systems
- Multimedia Distribution Centers

Residential Enclosures

Metal Residential Enclosure

Features
