

# BOOTS

---

## Description

High-quality protective boots designed to safeguard connector latch clips from damage and accidental disconnection. Available in multiple colors (Blue, Grey, Black, and White), these boots enhance durability, cable management, and easy identification in networking and structured cabling systems.

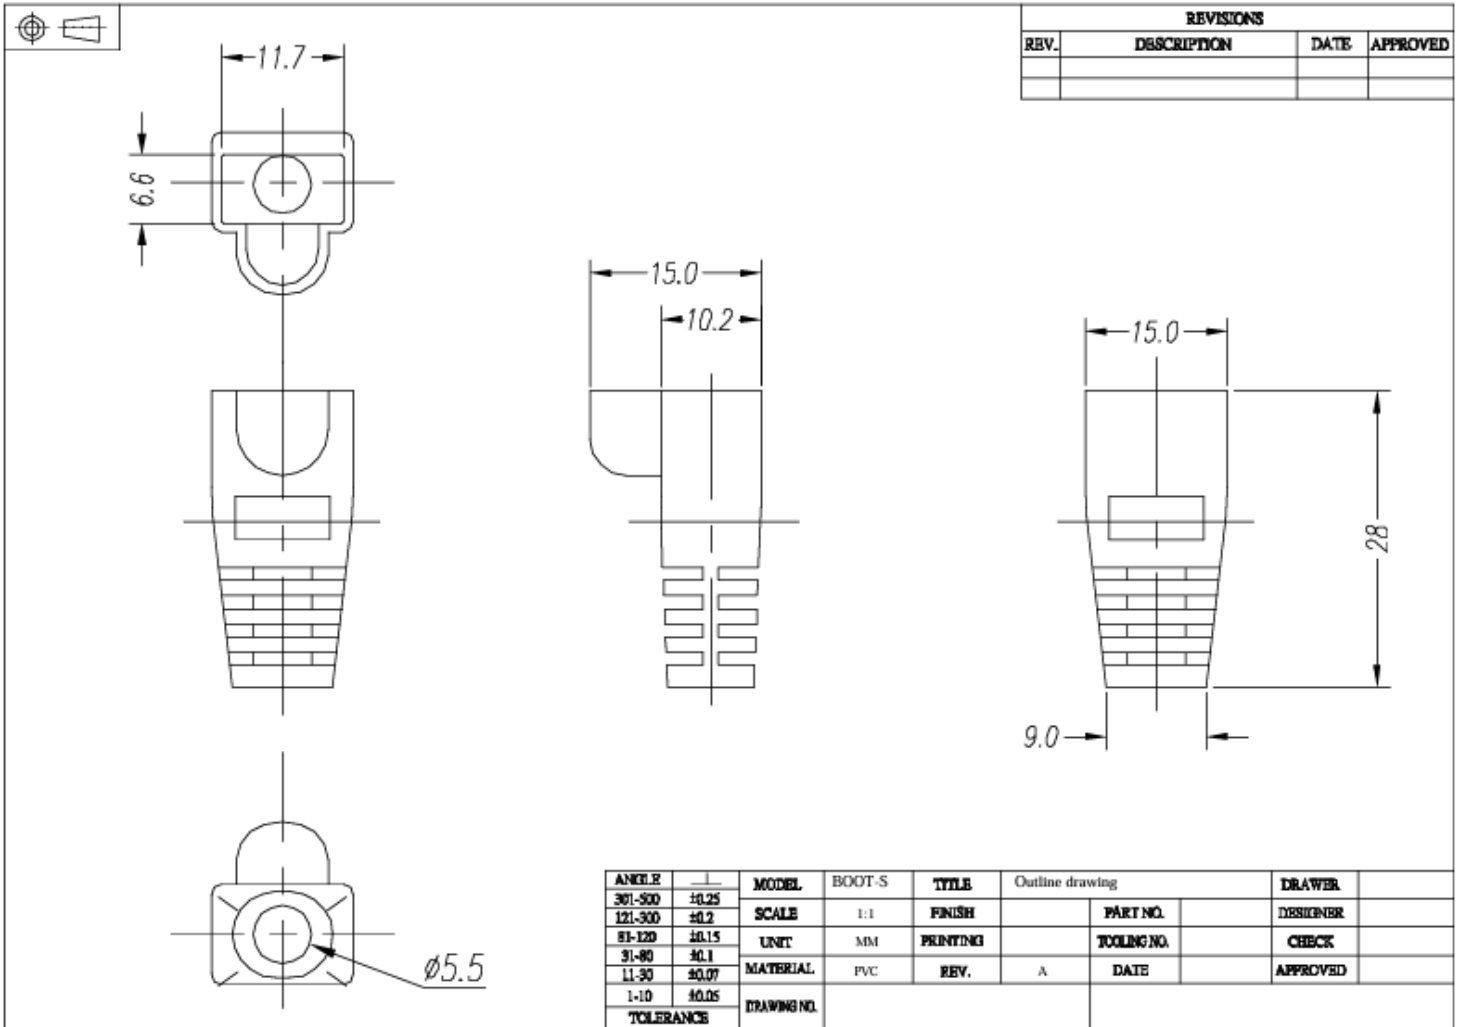

## Applications

- Used in LAN and structured cabling systems to protect RJ45 connectors
- Ideal for data centers and server rooms for secure cable connections
- Suitable for telecommunication networks
- Helps in office and home networking installations
- Used in patch cords and Ethernet cable assemblies for better durability
- Supports color coding for easy cable identification and management
