

Combination Solutions

Video/Data/ Voice Combo Module

Description

The innovative Combo Module integrates Telecom and Video, Patch Panel and 10/100 Base-T Switch on one module. The space-saving design is ideal for small or medium installation.

The Video/Telecom combination module consists of a video splitter and a telecom module, which supports four telephone lines to up to eight locations. The Data/Ethernet Switch combination module consists of a 5-port 10/100 Base-T mini Switch and a four port patch panel for data distribution.

Applications

- Residential Structured Cabling Systems
- Home Internet and Network Distribution
- TV and Telephone Signal Distribution
- Small Office or SOHO Installations
